OBJECTIVE

Full Stack Software Engineer with four years of professional experience. Committed to delivering high-quality solutions, optimizing software performance, and driving efficient development practices. Seeking a challenging role that leverages my expertise in Java to contribute to the success of a dynamic and innovative organization.

EXPERIENCE

Software Engineer   May 2024 - Present
PayPal   *Austin, TX*

- Working on the Non-Card Settlement team, developing features that handle transactions using Java, Big Query, Oracle SQL, and Tableau.

- Participating in the oncall rotation, diagnosing and mitigating job failures as well as keeping documentation up to date.

Software Development Engineer, Amazon FSx   February 2022 - April 2023
Amazon Web Services (AWS)   *New York, NY*

- Worked on the Control Plane team for FSx, a highly scalable and robust cloud-based Storage-as-a-Service (SaaS) solution.

- Operated service as oncall regularly, monitoring alarms and graphs for problematic trends and working with the oncall team to identify possible future incidents.

- Contributed to the continuous improvement of development processes, implementing automation techniques and CI/CD pipelines through CodePipeline to streamline software delivery and enhance team productivity.

- Expanded the service into four new regions in record time by adapting service components, cloud infrastructure, and region build processes as needed.

- Developed command line tools and shell scripts to be used by oncall operators through Linux, including authorization and authentication services.

Software Engineer   August 2019 - February 2022
American Express   *New York, NY*

- Worked on the Acquisition team as both a Front-End Engineer and later a Back-End Engineer, delivering features using Java, JavaScript and React.

- Integrated the Personal Checking Account journey by creating RESTful APIs using Java, JBoss, Couchbase and PostgreSQL.

- Participated in multiple buddy programs to help guide incoming interns and colleagues through the onboarding process.

EDUCATION

Bachelor of Computer Science , University of Houston   August 2016 - May 2019
    Degree specialized in Software Design
    President of CougarCS
